Needs Assessment Survey Report: Current Digital Skills and Environmental Awareness Among Youth Workers and Their Target Groups

Introduction

The introduction provides an overview of the EDYP's objectives and the rationale behind the needs assessment survey. It succinctly states that the purpose of the survey is to align the project's activities with the real needs of youth workers and their target groups. This highlights the project's commitment to data-driven planning and relevance to Erasmus+ goals.

Strength: Connects the survey to project goals.

Recommendation: Consider emphasizing the collaborative efforts among the participating organizations to reinforce the project's transnational impact.

Methodology

This section outlines the mixed-methods approach used to gather data. Combining surveys, focus groups, and interviews ensures a comprehensive understanding of the challenges faced by youth workers and their target groups.

Strength: The integration of qualitative and quantitative methods ensures depth and reliability.

Recommendation: Expand on how participants were selected for focus groups and interviews to clarify representativeness and inclusivity.

Key Findings

Digital Skills

This paragraph highlights the strengths and gaps in youth workers' digital skills. While basic literacy is strong, advanced skills for engagement and advocacy are lacking. The finding that youth workers are confident in personal use but not professional application suggests the need for tailored training.

Strength: Identifies specific skill gaps, which is crucial for designing effective interventions.

Recommendation: Provide examples of the "advanced competencies" mentioned, such as specific tools or platforms where deficiencies were noted.

Environmental Awareness

This paragraph assesses the level of environmental knowledge among youth workers and their ability to transfer this awareness to young people. The lack of actionable strategies and tools for advocacy points to a significant area for improvement.

Strength: Focuses on the practical implications of environmental awareness gaps, such as the inability to inspire action among youth.

Recommendation: Highlight which specific environmental topics (e.g., renewable energy, circular economy) were particularly lacking to better inform content development.

Barriers and Challenges

This section addresses the systemic and practical obstacles faced by youth workers. The identification of limited resources and engagement challenges for disadvantaged groups is particularly important for targeting the project's inclusivity goals.

Strength: Directly links the challenges to the target groups, making it clear where support is needed.

Recommendation: Discuss how these barriers differ between urban and rural contexts or among different organizations.

Opportunities

The survey revealed areas of enthusiasm and potential, such as a strong interest in digital storytelling and collaboration. These opportunities demonstrate the readiness of youth workers to embrace the project's objectives if given the right tools and support.

Strength: Balances the challenges with actionable opportunities, providing a positive outlook.

Recommendation: Suggest specific platforms or tools for fostering the "collaborative sharing" mentioned to make this opportunity more tangible.

Implications for EDYP

This section translates findings into actionable recommendations, such as focusing on practical training and resource allocation. It directly ties these strategies to the project's goals, ensuring alignment with Erasmus+ priorities like digital transformation and inclusivity.

Strength: Provides clear, actionable steps that address the identified gaps and opportunities.

Recommendation: Offer a timeline or framework for implementing these recommendations during the project's phases to give this section more structure.

Conclusion

The conclusion effectively ties the findings back to the project's objectives, reinforcing the importance of targeted interventions. It highlights how addressing the gaps will empower youth workers to make a tangible impact.

Strength: Emphasizes the project's alignment with broader goals, such as sustainability and digital inclusion.

Recommendation: Include a statement on how success will be measured, such as specific indicators for improved skills or awareness among youth workers and their target groups.

Overall, the report provides a thorough analysis of the current state of digital skills and environmental awareness, offering a strong foundation for the EDYP's activities. Implementing the recommendations from the analysis will strengthen its impact and ensure its relevance to the needs of youth workers and their communities.
